REMOTELY ACTUATED WEAPON SYSTEM

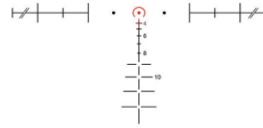

Platform-Agnostic Modular Lower Receiver

The Remotely Actuated Weapon (RAW) is capable of mounting to static or dynamic ground, air, and maritime platforms. Optionally, the RAW includes a patented low-profile gimbal accessory allowing user-defined restricted azimuths and refined elevation adjustments in a very low profile. The system is capable of remote safe and fire sequences over secure packet networks, software-defined interfaces, and compliant tethered networks. Internal components are designed to mitigate malfunctions and withstand aggressive vibration and shock in austere conditions. Designed to keep the operator in-the-loop and out of danger, RAW is an unmatched solution for the modern battlefield.

REMOTELY ACTUATED WEAPON SYSTEM

Platform-Agnostic Modular Lower Receiver

ONYX

Optic-agnostic by using over the primary link

Modular hardware and intelligent software to adopt any upper receiver and caliber

Tailored mounting & software integration solutions for any platform, static or mobile

Target acquisition through integrated sensor and aiming through an **etched reticle for reliable accuracy**

PRODUCT SPECIFICATIONS

/ Dimensions	15" x 4" x 2"
/ Weight	3.2lbs
/ Power	6hr optional battery and/or direct power slave
/ Control	Integrated secure 802.11 and/or direct control via primary digital link
/ Protection	Pending IP67 rating
/ Calibers	5.56x45mm - Fielded 300 AAC - Fielded 7.62x51mm - Fielded 7.62x39mm - Fielded 9x19mm - Currently Testing 40mm - Currently Testing 6.8mm - Future Development

KEY FEATURES

- Capable of **remote zeroizing** and **fire select locking** to inhibit unintended or unauthorized use.
- Encased in a **resilient, anti-corrosive metal**.
- Pending certification for safe fire select.
- Future systems incorporate the ability to:
 - ✓ Clear malfunctions
 - ✓ Integrate conventional weapon accessories
 - ✓ Additional advanced features currently in development.

Edge processing for advanced capabilities

Compatible with TAK suite

Integrated laser and ranging features

Secure wireless connection

Suitable with most visual acquisition systems

Tailored to mount on customer-preferred platforms

Training Available | Color Customizable | Discounts available on bulk purchases
